

REFLECTIVE LIGHT BELT

USER MANUAL

Congratulations, you've made a wise purchase!

The **Avanto Reflective Light Belt** is designed for people who stay active after dark. It improves safety both when exercising in or near traffic and in unlit areas. The adjustable, versatile and one-size-fits-all running belt has three light modes, and the zippered waterproof pouch is ideal for carrying keys, a phone, and money when you're on the go. It is also a great gift idea for anyone who could use a little more safety or for the daily adventurer who seems to have it all.

HOW TO WEAR:

The belt is designed to fit adults from size XS to XL, and the straps are elastic for maximum comfort. First, find the most comfortable place on your waist for the pouch to sit and adjust the belt until it sits snugly. When properly adjusted, the belt should not bounce as you move.

Operation

Press the button once to turn the light on; it is now in “quick flash” mode. Press it again to change to “slow flash.” Click it a third time to change to “glow.” Press it a fourth time to turn the unit off. A fully charged battery provides 52 hours of light in glow mode.

Visibility at night

The Light Belt is visible up to a distance of 460 feet.

Pouch pocket

The zippered pouch is made from water-resistant material. You can use it for carrying essentials such as a phone, keys, and cash and cards, even in rainy conditions.

Charging

The battery is charged at the factory and the light is shipped ready to use. To recharge, connect the USB cable (included) to the charging socket, then connect the other end to a suitable USB power supply (e.g., a phone charger or computer). Avoid high-power chargers, which may damage the battery! The battery needs 70 minutes to recharge completely.

***Charging socket**

Important! do not leave the light on unattended! Your light has a lithium polymer-type battery. The light remains bright and does not dim until the power is almost exhausted. When the beam begins to dim and the charge level indicates only one light, the battery is almost exhausted. Turn off the light to prevent deep battery discharge.

Deep battery discharge will damage the battery and shorten battery life. The battery lasts for about 600 charges when used correctly. If you do not plan to use the light for a long time, charge it fully before storage to prevent deep discharge.

SAFETY INSTRUCTIONS AND WARNINGS

The light should be used according to the following instructions to avoid damage. Please read carefully before use.

Small parts present a choking hazard. Keep the product in a safe place, out of the reach of small children. The product is not suitable for children under 6 years of age.

Safety instructions

- Use the product only in a temperature range of -4 to 140° F
- Do not expose to direct heat or constant sunlight.
- Avoid exposure to solvents and/or vapors.
- Do not use in areas where flammable gases may be present.
- Avoid prolonged exposure to strong vibrations.

Handling, maintenance and disposal

- Handle the product carefully. Do not pull on the USB cord unnecessarily.
- Do not look directly at the light. Do not aim the beam at humans' or animals' faces.
- The LED unit may become hot during use. To avoid overheating, do not cover the product when in use.
- If you do not plan to use the light for a long time, charge it before storage to prevent deep discharge of the battery.
- Do not attempt to modify or repair the product. In the event of a malfunction, please contact our customer service (avantolifestyle.com/contact). We will be happy to help you.
- Dispose of or recycle the product according to local regulations.
